

National Specification for R&D Call2

Narodowe Centrum Badan i Rozwoju (NCBiR)
Poland

The NCBiR (The National Centre for Research and Development) is a national legal entity established to manage and implement strategic scientific research and development programmes. The Centre is a specialized and professional governmental institution identified by scientific and business communities as the main organizer of applied research programmes, whose results will be used by the economy and the public sector. The Centre’s mission is to support Polish scientific institutions and enterprises to develop their capabilities to create applications and solutions based on R&D results in order to boost the economy and for the benefit of society as a whole. The Centre is financed from the state budget and the European Union funds.
