Technology Strategy Board  
Driving Innovation

### **National Specification for R&D Call 2**

Technology Strategy Board (TSB)  
United Kingdom

The Technology Strategy Board was established by the UK Government as a business-led executive non-departmental public body in July 2007.

The Technology Strategy Board invest in research and development, building national and international partnerships between business, research and Government to address major societal challenges; and run a wide range of knowledge exchange programmes to help innovation flourish. With a leading role in UK innovation, we help to build and maintain the country's global competitiveness. We operate across Government and work in partnership not only with business but with Government departments, Devolved Administrations and University Research Councils.
