

## ERA-CHEMISTRY

A network of research councils for the development and implementation of joint bottom-up European programs for curiosity driven research

### THEMATIC PRIORITY

Basic research on Chemistry

### PROJECT FUNDING

Transnational calls for research proposals

### DESCRIPTION

ERA-Chemistry is a consortium of 11 research funding organisations from 10 European countries with the goal to develop and implement joint bottom-up European funding programs. The network is focused on establishing European collaboration in chemistry research and neighboring disciplines without national or formal boundaries, and moreover, it increases the competitiveness of chemical researchers in Europe by developing and implementing new European research conference schemes.

Since 2009 the network receives no external financing. The main activities in 2013 are the organisation of the Call 2013 (Open Initiative)

### ACTIVITY SUMMARY (November 2013 – May 2014)

#### Project funding

Joint Call 2013 – open initiative

#### Meetings & Conferences

-

#### Deliverables, studies, results

-

#### Activities:

Evaluation of project proposals

#### Others:

-

### START & END DATES

EC funding (FP 6): from beginning of 2004 to end of 2008

Since 2009: Continuation without external funding
