

## ECO-WEB

EcoWeb a dynamic e-dissemination platform for EU eco-innovation research results

### THEMATIC PRIORITY

To bring companies close to relevant eco-innovation EU funded results through semantic-web-technology

### PROJECT FUNDING

No project funding

### DESCRIPTION

EcoWeb will bring EU research results on the area of eco-innovation and clean technologies, to enterprises through semantic-web-technology and existing eco-innovation networks and multipliers.

The aim of the project is to develop a dynamic platform (EcoWeb) for enterprises, especially SMEs, to take up eco-innovation results from EU funded research.

EcoWeb combines an interactive web portal that dynamically integrates state-of-the-art user support and usability technologies, plus a network of multipliers to spread relevant results to specific SME. An added value of the EcoWeb platform is that relevant results will be brought to SMEs even if they are lacking time to actively look out for innovative input. Multipliers searching for results in eco-innovation areas interesting for their clientele as well as SMEs searching for innovative results will be able to find them through few interactions.

EcoWeb is a solution for European SMEs – eco-industries as well as conventional enterprises – to uptake EU funded eco-innovation results in an easy way. EcoWeb will gather eco-innovation results from EU funded projects to allow SMEs to grow in eco-innovation, through Eco- Web project.

### ACTIVITY SUMMARY (November 2013 – May 2014)

#### Project funding:

No project funding available

#### Meetings & Conferences:

-

#### Deliverable, studies, results:

Web-platform has been launched in April 2013 - <http://www.ecoweb.info/>

#### Activities of the network:

Dissemination work for Web-platform

#### Others:

-

### START & END DATES

01.09.2011 - 31.08.2013
